**Soft Plastic Seating**

Whatever your furniture needs and preferences may be, Virco gives you lots of soft plastic seating choices. We carry seven diverse product lines with a range of styles and seat heights that work anywhere from Pre-K through adult education. Our expanded soft plastic palette lets you choose from 29 exciting colors.

Virco’s newest soft plastic chair collection, Metaphor® was conceived by award-winning designers Peter Glass and Bob Mills as an updated sequel to the 9000 Classic Series™. With improvements in comfort, ergonomics, and manufacturing efficiencies, Metaphor chairs deliver long-lasting, supportive performance in K-12 settings. They can also be arranged in 12-high, truly vertical stacks for easier movement, storage and classroom cleaning.

Why do we describe Zuma® by Peter Glass and Bob Mills as the point of rest for classroom furniture? Because Zuma bridges the gap: between ergonomic support and a sense of style that’s welcoming to students; between durable construction and sustainable product design; and ultimately, between budgetary pressures and actual affordability. Educators agree: following its 2004 unveiling, Zuma went on to establish a new initial-year sales record for Virco products.

Another Glass/Mills creation, Sage™ has a larger chair shell and a wider backrest that’s perfectly contoured for high school, college and university, and adult learning environments. Generously proportioned Sage models are particularly appropriate for today’s physically larger student population.

With a comfortable articulating back that provides intuitively effective support, Virtuoso® chairs by Charles Perry occupy a unique place in Virco’s seating lineup. In addition to their plastic seat and back configuration, they’re Virco’s only classroom chairs that can be ordered with a padded, fully upholstered seat and back.

**Choosing Furniture**

continued from page 3

the parameters of your budget. But when you team-up with a school furniture manufacturer that offers a complete range of quality product lines at a variety of price points, and a comprehensive FF&E planning service for construction projects and large furniture purchases – like Virco’s PlanSCAPE® service – this challenge becomes much easier to handle.

At Virco, we’ve got the resources to make it easy for you to find the furniture that’s best for your school or district. Your Virco representative would be glad to help you evaluate any – or all – of the factors indicated here so that you can be sure to choose the right furniture.

Is there any question that the Classic Series™ has attained iconic status? We’ve sold more than 47,500,000 Classic Series models. That fact alone testifies to the enduring practicality of these instantly recognizable chairs.

Popular with many school districts, 2000 Series chairs combine a smooth polypropylene shell with a comfortable waterfall seat front. Designed – like all Virco classroom chairs – to withstand the rigors of learning environments, the 2000 Series is an excellent furniture value.

Suggestions are for students of average height and weight.

Seat heights should be measured by calculating the distance from the floor to the top of the front curve of the seat. Measurements should not be taken at the seat’s side or rear.

If at all possible, measure the heights of a representative sample of students in each grade prior to each school year. This will help you more accurately determine your specific seating needs as time goes by.

Soft plastic seats are available in 29 standard and designer colors.
Hard Plastic Seating

Why do so many schools specify hard plastic classroom furniture? Because, as our traditional Martest 21® hard plastic formulation suggests, it isn’t easily scratched or marred; it doesn’t fade; and it’s impervious to flames. In addition to Martest 21, Virco now offers Fortified Recycled Wood™ (FRW™) hard plastic. Four Virco hard plastic seating lines give you a variety of features and benefits.

Telos® Series
8 models - page 48
Grades: K through College

Newly released Telos® chairs, designed by Peter Glass and Bob Mills, deliver an unsurpassed level of hard plastic seating performance. Made with Fortified Recycled Wood hard plastic components, Telos offers the sustainability features and ergonomic benefits found in our ZUMAfrd line. Telos also gives you the unprecedented convenience of hard plastic chairs that can be arranged in 10-high, truly vertical stacks.

ZUMAfrd™ Series
3 models - page 54
Grades: K through College

With seats and backs made from Virco’s proprietary Fortified Recycled Wood™ (FRW™), ZUMAfrd™ products combine all the benefits of hard plastic classroom furniture with highly sustainable materials. Thanks to the efforts of Peter Glass and Bob Mills – and to Virco’s innovative mold designs and advanced process controls – the ergonomically contoured ZUMAfrd line offers the most comfortable hard plastic chairs you can buy.

3000 Series
12 models - page 56
Grades: K through College

For decades, educators have relied on 3000 Series classroom chairs with colorfast, scratch-resistant, flameproof Martest 21® hard plastic seats and backs. These traditional products continue to provide dependable service in thousands of schools from coast to coast.

3300 Series
4 models - page 61
Grades: K through College

A rectangular back and a unitized, 1” diameter steel frame give 3300 Series chairs their characteristic appeal. Like our 3000 Series chairs, all 3300 Series models feature seats and backs made from Martest 21 hard plastic.

MARTEST 21 HARD PLASTIC

Made from wood flour, resin, and other essential ingredients processed under carefully controlled conditions, Martest 21 hard plastic components are renowned for their colorfast appearance, scratch-resistant durability and flameproof safety. Martest 21 furniture has a proven history of long-lasting classroom performance.

FRW HARD PLASTIC

With the same performance characteristics as Martest 21, Virco’s FRW hard plastic formulation provides added levels of sustainability. FRW components contain recycled-content materials; when available, they’re made with post-consumer materials reclaimed through Virco’s Take-Back program! All Telos and ZUMAfrd seats and backs are standard with ergonomically contoured FRW hard plastic for comfort and support.
metaphor®

Metaphor® is a bridge from the past to the present. Designed by Peter Glass and Bob Mills, Metaphor reminds us of an old familiar face, yet it’s fresh and alive. Drawing on the successes of the past, Virco has engineered Metaphor to deliver the best of the best – the richness of colors from our ZUMA® Series, the contoured comforts of Sage™ and I.Q.®, and the trademark durability you’ve come to expect from Virco products – all based on a fully unitized steel frame in the tradition of our 9000 Classic Series™.

Metaphor, like hundreds of other Virco products, has earned indoor air quality certification through the GREENGUARD® for Children and Schools Program.

Built on the 9000 Classic Series Legacy
Metaphor’s new, exciting design was inspired by the most popular classroom furniture series ever with over 47,500,000 units sold since 1965.
**Metaphor® Features**

**Contoured Shell**
Metaphor® offers a beautifully sculpted seat for lasting comfort. A gently curved lumbar area, a deeply contoured seat pocket, softened edges and a waterfall front make this a uniquely comfortable chair.

**True-Vertical Stack**
All Metaphor 4-leg models can be stacked 12 high. No other classroom series chair stacks up to it.

**Concealed Rivets**
The Metaphor shell has 8 attachment points consisting of two molded-in frame pockets and six concealed rivets.

**Textured Shell**
Metaphor has a uniquely textured polypropylene shell for slip-resistance and durability.

**Full Perimeter Frame**
Strength and durability are the main benefits of a full perimeter frame chair and Metaphor delivers that and more...extraordinary comfort not usually experienced in a full-framed seat.

**Off-The-Floor Nesting**
The Metaphor seat sits flat on a desk top providing easy access for cleaning.
Metaphor®
Stack Chairs

Metaphor® is available in 4 sizes to fit students in pre-K through 12. The seat has been designed to provide surprising comfort for a fully-framed chair. And that’s important because students spend more time in their classroom chair than any other seat during the day. The waterfall front, deep seat pocket and rolled back seat crest provide excellent ergonomic support.

Superior Stacking Capabilities
All Metaphor 4-leg models can be stacked 12 high. No other classroom series chair stacks up to it.

Feel free to contact your Virco Representative with any questions or concerns you may have regarding classroom seating.
ZUMA® Seating

Best-selling ZUMA® 4-leg chairs give your students a comfortably flexible backrest; a wide, spacious seat; and a gently sloping waterfall front that’s easy on their legs. With 13”, 15” and 18” seat heights, these chairs provide effective furniture support for students throughout the K-12 spectrum. A 10” ZUMA chair for early learning venues complements our other ZUMA 4-leg models. Like hundreds of other Virco models, all ZUMA chairs are certified according to the stringent GREENGUARD® indoor air quality standard for children and schools.

Passive Ergonomics
From intuitive backrest ribs to a supportive contoured seat, ZUMA chairs and combo units incorporate passive ergonomic features for long-lasting comfort.

Fixed-Height ZUMA Chairs
ZUMA’s comfortable fixed-height chairs deliver contoured seating for a full spectrum of educational settings.

Since its introduction in June of 2004, ZUMA has been awarded the coveted NeoCon® Editors’ Choice Award and Design Journal’s ADEX Platinum Award.

See the accompanying price list for Quick Ship models and color selections.
See page 277 & 279 for information on chair trucks. Please refer to page 311 for "Guidelines for Stacking & Moving Furniture."

**ZUMA® Chair with 10” Seat Height**

For early learning environments, ZUMA’s student chair selection includes a 10” seat-height model.

ZUMA® Seating

The organic curves of the ZUMA® cantilever chair mimic nature’s non-linear flow, providing an elegant alternative to the hard-edged institutional look that afflicts so many classrooms. The intrinsic flex of the cantilever chair provides surprising comfort - lean forward for typing or note taking and the frame firms up; lean back and it relaxes. Three seat heights let you bring cool, supportive ZUMA cantilever seating to elementary schools, college campuses or anywhere in between.

Passive Ergonomics
From intuitive backrest ribs to a supportive contoured seat, ZUMA chairs and combo units incorporate passive ergonomic features for long-lasting comfort.

ZUMA Cantilever Chairs
An elegant fusion of style and ergonomic support makes Virco’s ZUMA cantilever chairs great for focused work or relaxing.

ZCANT18 chairs are designed to nest with ZUMA single-student cantilever desks.

ZUMA® Rocks

With a sleek, inviting feel and a moderate range of motion, the ZUMA® 18” rocking chair works in libraries, breakrooms, reading nooks, or as a side chair in the classroom. For elementary and middle schools, 13” and 15” models let younger, smaller students experience the fun that comes with a ZUMA rocker. Guaranteed to brighten the mood of any environment: ZUMA rocks!

ZUMA Rockers

These small-scale rocking chairs with a moderate range of motion are appropriate for libraries, reading nooks, break rooms or as side chairs in the classroom. Guaranteed to brighten the mood of any environment.

By popular demand, Virco’s generously sculpted, super-comfortable Sage™ Series now provides a variety of pre-school through adult-learning seating solutions. Originally conceived by the award-winning team of Peter Glass and Bob Mills for use in high schools, colleges, universities and related settings, customer satisfaction with Sage inspired the development of additional models to complement early learning, elementary and middle school environments.

Along with its original adult-height models, Sage now offers a 13” and a 15” 4-leg chair, and a corresponding pair of cantilever chairs. In addition to these chairs for younger, smaller students, we’re introducing an articulating Sage tablet arm model for high school and adult learning venues. Selected adult-height Sage models can also now be ordered with a padded, upholstered seat.

Sage’s generously sculpted shell enables better seating load distribution for less fatigue, greater comfort and enhanced circulation. A flexible, high-profile backrest with raised contours provides a smoother “ride” when leaning back in the chair. Aesthetically, Sage unites understated contours, an elegantly dimpled backrest and a gently rolled perimeter for balanced styling.

See page 277 & 279 for information on chair trucks. Please refer to page 311 for “Guidelines for Stacking & Moving Furniture.”
Fixed-Height Sage™ Chairs
Sage chairs with 13”, 15”, 18” and 19” seat heights elegantly combine good looks with exceptional seating comfort.

Passive Ergonomics
From intuitive backrest ribs to a supportive contoured seat, Sage chairs and combo units incorporate passive ergonomic features for long-lasting comfort.

For decades, Virco’s Classic Series™ and Martest 21® products set the standard of excellence for classroom furniture. While these popular lines continue to provide outstanding service in thousands of venues, it’s undeniable that the passage of time has brought important changes to our educational landscape.

Fundamental learning activities have been supplemented by computers, the Internet and other technology. And just as the content and character of age-old curricula have grown and evolved, so has our awareness of what constitutes an ergonomically supportive learning environment, especially in light of the growing diversity of our student population. That’s why Virco has worked with internationally renowned designer Richard Holbrook to develop the I.Q.® furniture line. Grounded in Holbrook’s extensive research and observation of classroom settings throughout the nation, I.Q. was honored with a Best of NeoCon® Gold Award at America’s most prestigious furniture trade show.

Unlike the typical educational seating of past generations, all I.Q. chairs and chair desks feature a gentle lumbar curve to more effectively support the lower back. The concave shape of the I.Q. seat more fully conforms to the human body’s natural contours. With a waterfall front that’s easier on your legs and an extra-wide design that accommodates a wider range of movement in the chair - a particularly important point when it comes to irrepressibly active younger students - I.Q. delivers sustained seating comfort.

With I.Q., educational seating is now more supportive, more size-sensitive, more stylish: and ultimately, more intelligent. What else would you expect from a higher level of furniture?
I.Q.® Series Seating

Virco’s I.Q.® Series by Richard Holbrook offers smart seating solutions for today’s learning environments. Drawing on his wide-ranging international design experience, Holbrook has fashioned a diverse, yet balanced product collection to provide flexibility and support in classrooms, lecture halls, dining areas, seminar settings, administrative environments and libraries.

The I.Q. Series includes a selection of 4-leg chairs featuring a contoured seat with built-in lumbar support and a heavy-gauge 7/8” tubular steel frame. Models are available in 17 1/2”, 15 1/2” and 13” seat heights.

Sled-based I.Q. chairs also give you the comfort and support of Richard Holbrook’s ergonomically contoured shell. In addition, sled-based models come with a sturdy 3/4” tubular steel frame and an underseat steel support plate. Like I.Q.’s 4-leg models, these chairs can be ordered with 17 1/2”, 15 1/2” and 13” seat heights.

Comfort

Designed in light of Richard Holbrook’s extensive research, I.Q. chairs flex to enhance your seating comfort.

Stacking

I.Q. 4-leg chairs stack four-high.

Classic Series™ Classroom Chairs

Over the years, Virco's 9000 Classic Series™ chairs have become an integral part of our educational landscape. These popular chairs are fixtures in thousands of classrooms across the nation, and around the world. They're available in 12 attractive colors and five seat heights to coordinate with your learning environment. A padded 18" version (model 9018P) is also available.

9600 Series chairs feature a sled-based design that's ideal for carpeted surfaces only. Like our 9000 Series chairs, they stack efficiently for easy storage.

The Classic Series includes four mobile chairs. Model 9050 and padded model 9050P feature a traditional 4-leg design, while padded model 9260PGC comes with a five-point base. As an added convenience, our model 9260PGC has a pneumatic mechanism for instant, ultra-easy adjustments, as does our model 9260GCLS lab stool.

2000 Series Chairs

Virco’s stackable 2000 Series chairs combine the strength of heavy-gauge tubular steel legs with a smooth polypropylene shell and a comfortably contoured waterfall seat front. They’re available in 12”, 14”, 16” and 18” seat heights for use in all grade levels; an additional 18” model comes with a padded, upholstered seat and back. And if you prefer sled-based chairs, we’ve got models with four seat heights.

Like Virco’s other classroom furniture lines, the 2000 Series includes a selection of chair desks. Our popular model 2700BR features a space-efficient footprint and tablet arm configuration, while the model 2400BR gives you a generous 18” x 24” work surface. If your applications require sled-based seating, our model 2440BR delivers excellent service.

We also offer a 2000 Series mobile task chair with a rugged 5-point base and an easy-to-operate pneumatic height adjustment mechanism.

2440BR (shown) and 2400NBR

For a chair desk that features a spacious 18” x 24” high-pressure laminate work surface with a welded-on steel-rod bookrack, look no further than Virco’s model 2400BR. Model 2400NBR comes without a bookrack.

2400BR

Model 2400BR sled-based combos give you the convenience of double-entry seating along with a steel-rod underseat bookrack.

2700BR

With its compact tablet arm configuration, Virco’s model 2700BR helps you devise effective space-saving classroom layouts.

Plastic glides come standard on model 2440BR.

Vinco Inc.
Telos® Stack Chairs

Fixed-height Telos® chairs come in four sizes for pre-K through high school settings. The contoured seat and back provide outstanding comfort for hard plastic chairs. Since students spend more time in their classroom chairs during the day than in any other seat, that’s especially important. With Telos, your students get excellent ergonomic support from a deeply relieved seat, a waterfall front and a generous back surface. We invite you and your students to “test sit” a Telos chair to feel the difference!

Superior Stacking Capabilities

Unlike other hard plastic seating products, Telos 4-leg chairs can be arranged in 10-high vertical stacks. In addition, model N318 Telos chairs can stack 10-high for use with selected Virco chair trucks.

Telos Colors

Available in all related Standard and Designer colors.

Seats and backs are also available in Martest 21 hard plastic colors.

See the accompanying price list for Quick Ship models and color selections.
Suggestions are for students of average height and weight.

Seat heights should be measured by calculating the distance from the floor to the top of the front curve of the seat. Measurements should not be taken at the seat’s side or rear. If at all possible, measure the heights of a representative sample of students in each grade prior to each school year. This will help you more accurately determine your specific seating needs as time goes by.

Feel free to contact your Virco Representative with any questions or concerns you may have regarding classroom seating.
3000 Series Hard Plastic Seating

Virco’s popular Martest 21® hard plastic chair line begins with our best-selling 3000 Series. These stackable chairs come in four Quick Ship sizes that readily work in an array of grade levels. 3000 Series models are available with 12”, 14”, 16” and 18” seat heights.
